

ANAMET PROTECTIVE CASING

Bulletin #207A

What is **UHB Anamet protective casing**? It is extremely flexible metal casing (hose) made from 304 grade stainless steel in non-traditional sizes.

UHB Anamet casing's interlocked construction provides extremely high tensile strength and crush resistance. In addition to being extremely flexible this protective casing also has the ability to be either fully compressed or fully expanded, depending on what your application demands.

UHB offers other Anamet products in square lock and interlock styles. All Anamet products are available for custom applications. Contact our sales staff for assistance.

STANDARD APPLICATIONS

***Crush protection over wires and fiber optic communication cables**

***Wear protection over aerospace and avionic cable assemblies and hoses**

***Internal protection and strength enhancement of other hose assemblies**

***Blow Out Protection over other high pressure hose assemblies**

***Parachute Rip Cord Cable & Wire Casings**
