

ANAMET ULTRAFLEX INTERLOCK PROTECTIVE CASING

Bulletin #207C

What is UHB Anamet Ultraflex Interlock? It is extremely flexible metal casing (hose) made from 304 grade stainless steel in traditional sizes.

Universal Hose & Braid Ultraflex Interlock construction provides extremely high tensile strength and crush resistance. In addition to being flexible this protective hose also has the ability to be either fully compressed or fully expanded, depending on what your application demands.

UHB offers other Anamet products in square lock and casing styles. All Anamet products are available for custom applications.

Contact our sales staff for assistance.

STANDARD APPLICATIONS

***Crush protection over wires and fiber optic communication cables**

***Wear protection over aerospace and avionic cable assemblies and hoses**

***Internal protection and strength enhancement of other hose assemblies**
