

Stay-Put metal flexible coolant hose

Bulletin #401

Manufactured from High-tensile strength spring steel, "Stay-Put" coolant hoses may be bent to accurately direct the free flow of fluid allowing for more effective operations no matter of the application. Standard "Stay-Put" hose configuration is supplied with a brass male pipe thread nipple with hex on one end and a brass nozzle on the other end. Available options include male or female fittings on either end (consult our sales team for further details). "Stay-Put" coolant hoses are for non-pressure applications only.
